

# **HOW CAN I GET BITCOIN?**

There are many ways to acquire Bitcoin. The most popular method is via purchase on cryptocurrency exchanges, where you can trade traditional currencies (like dollars, Euros, Yen) for Bitcoin.

You can also accept payment for goods or services in Bitcoin.

Consider asking your employer about paying your salary, or part of it, in bitcoin.

Remember, even though exchanges are a popular and easy way to acquire Bitcoin, they're not recommended for long-term storage due to many risks. Assets stored on an exchange aren't fully yours, since you don't control the private keys to your wallet. Hence goes the saying:

## **“NOT YOUR KEYS, NOT YOUR BITCOIN”**

In legal terms, you are not the owner of assets deposited on an exchange, you are only entitled to make a claim for their withdrawal.

Ensure the safety of your Bitcoin by using your own hardware wallet for storage.
